

Critical Aspects of Construction Documents

The increasing complexity of the Design and Construction process demands in depth technical knowledge of Construction Documents. This seminar will provide insight into the development, organization, and proper application of these documents. This understanding will have practical applicability for those involved in either the design or construction of a facility or the enforcement of compliance with a project's specified requirements.

Program Overview

- **Project Fundamentals**
 - Legal Implications
 - Construction Contract Types
 - Roles, Rights and Responsibilities
 - Contract Provisions
- **Project Concept & Delivery**
 - Team Selection, Organization
 - Delivery Method
 - Project Budget/Schedule
- **Design Process**
 - Required Documentation
 - QA/QC Process
 - Control Project Variables
- **Construction Documents**
 - Organization
- **Procurement**
 - Bidding/ Negotiating
 - Contracting
- **Pre-Construction**
 - Modifications
 - Substitution Requests
- **Construction**
 - Administering the Contract
 - Interpreting the Documents
- **Life Cycle Activities**
 - Life Cycle costs

FACULTY

Neil Davison, RA, FCSI, CCS, CCCA, SCIP – *Davison Associates*

CSI Institute Board Chair, Ron Geren, AIA, FCSI, CCS, CCCA, SCIP – *RLGA Technical Services*

Paul Simonsen, NCARB, FCSI *Distinguished Member*, CCS, CCCA, SCIP, LEED AP – *Technical Resources Consultants*

Providing essential insight into Construction Project Development, from Inception through Occupancy focusing on the Construction Documents

Practical application training for Owners and Owner Representatives, Experienced and Emerging Professionals, including:

- Architects
- Engineers
- Specifiers
- Designers
- BIM Modelers
- Contractors
- Field Engineers
- Project Managers
- Construction Managers
- A/E & Construction Support Staff
- Code Officials
- Commissioning Agents
- Construction Attorneys
- Product Representatives
- Educators

Sponsored by the Phoenix Chapter, Construction Specifications Institute

When: Friday, March 8th, 22nd, & 29th 2019
8:00 AM- 5:00 PM (Lunch provided)

Where: The Reference Library
(Map on reverse side)

Cost:

Attendee	\$275.00
2 nd Attendee, plus from same firm	\$200.00
Students (12+ credit hours)	\$ 85.00

Course Benefits

CSI, CDT exam prep

Exam registration costs and Project Delivery Practice Guide (PDPG)
2nd Edition Currently available in the CSI store

REGISTRATION

Register online at

<https://www.csiphoenix.org/events/construction-documents-technology-seminar>

Registration: Attendee - \$275. 2nd (+) attendee from same firm - \$200. Student - \$85.

(Seating Is Limited)

This seminar is based on, and supported by, the *CSI Project Delivery Practice Guide (PDPG)* and the AIA Document, A201 General Conditions of the Contract for Construction. Although study materials will be handed out during the seminar, it is highly recommended that a copy of the PDPG be purchased if you plan on taking the Construction Documents Technologist (CDT) Examination, administered by CSI. It is the essential study guide for the CDT exam and a valuable office resource. The AIA A201 will be a part of the handout materials. Information on purchasing the PDPG is available on the CSI website at www.csiresources.org/certification/cdt/cdt-source-materials

CSI Construction Documents Seminar

24 Hour Seminar, Friday, March 8th, 22nd, and 29th 2019

The Reference Library
99 E. Virginia Ave., suite 140
